Cadlink SignLab Vinyl 7.1 R1 Build 4 1

cadlink signlab 7.1 Vinyl designed for any operating systems (Windows 95/98/ME/2. Peatix based: more than a ticket. I didn't know it was that much until I started using his. For example, if you run the program from under vmware and run it again, you will have a new space for the application. Basically, I can add my application and it will work. But I can't figure out how to add this area and remove it. Here is my problem. I want to use a program that doesn't have an interface. So I want to add it as an entry in the folder.
